Rewards In order to motivate the users, Esser offers a variety of rewards in the form of calculators, keychains and other stuff. References External links Alarm Technologies Category:Fire alarm companiesIt is known to arrange connections to a data bus on a printed circuit board, and for an edge connector to be mounted on an edge of the circuit board, where the edge connector is adapted to receive an edge plug connector carrying data pins. In such a configuration, the end user has to interface the edge plug connector with the edge connector, by mating the edge plug connector into the edge connector. One problem with such a configuration is that it is not possible to test the edge connector at the factory. The test has to be carried out at the factory. The edge connector may need to be tested during the field installation of the circuit board. Tests during the field installation of the circuit board is not easy to carry out.config
